

在部署公司的web项目到myeclipse时遇到的一个错误：Access denied for user 'ODBC'@'localhost' (using password: NO)，貌似是mysql默认是不允许远程访问的。记录下，解决方案如下：

1. 停掉mysql服务
2. 找到mysql安装目录下的my.ini，找到里面的[mysqld] 然后在下面加上这句：skip_grant_tables （启动MySQL服务的时候跳过权限表认证）
记得保存保存。
3. 在cmd找到mysql的bin目录，然后输入命令：mysql -u root -p
不用输入密码，回车

```
C:\Users\Administrator.USER-20160425BT>cd C:\Program Files\MySQL\MySQL Server 5.7\bin
C:\Program Files\MySQL\MySQL Server 5.7\bin>mysql -u root -p
Enter password:
Welcome to the MySQL monitor.  Commands end with ; or \g.
Your MySQL connection id is 2
Server version: 5.7.16-log MySQL Community Server (GPL)

Type 'help;' or '\h' for help. Type '\c' to clear the current input statement.
```

4. 进去后， 输入：use mysql

```
mysql> use mysql
Database changed
mysql> update user set
```

5. 修改密码输入：update mysql.user set authentication_string = password("新设置的密码") where user="root";(我这里mysql的版本是5.7，其中密码列的属性叫做authentication_string；5.1的是password)；

```
mysql> update mysql.user set authentication_string=password('123456') where user
='root';
Query OK, 0 rows affected, 1 warning (0.07 sec)
Rows matched: 1  Changed: 0  Warnings: 1

mysql> flush privileges;
Query OK, 0 rows affected (0.19 sec)

mysql> quit
Bye
```

6. 刷新权限: flush privileges;
7. 退出: quit;
8. 将my.ini中的skip_grant_tables去掉, 恢复登录时候的权限表认证
9. 重启mysql服务, 再使用root和修改的密码登录即可: mysql -u root -p
然后输入密码验证, 成功进入说明成功了。

```
C:\Program Files\MySQL\MySQL Server 5.7\bin>mysql -u root -p
Enter password: *****
